Overview

Three types of operating valves are offered: Manual, Solenoid and Combination. All are available with 3/8", 1/2", 3/4" and 1-1/4" pipe threads. Airchime Solenoid and Combination Valves can be used in hazardous locations and have CSA approval for Closure Type 3, 4, 7 and 9 valves. They are CSA listed for use in Class I, Division 1, Groups A, B, C and D and Class 2, Division 1, Groups E, F and G.

Manual Valves

Used with whistle pull and/or lanyard.

Solenoid Valves

Activated locally by a switch or push button at location or remotely. Can be used at hazardous locations. Available in a wide range of operating voltages.

Combination Valves

Has the Standard Features of both manual and solenoid valves. Provides for operation of horn in the event of power failure.
